

## Press Release

### **Cimatron Strengthens Korean Presence with Acquisition of Korea Cimatron Technologies**

*Now holds 100% of former partially-owned distributor to complete consolidation of position in growing Korean market*

Givat Shmuel, Israel, – September 26, 2006– Cimatron Limited (NASDAQ: CIMT), a leading provider of integrated, quoting-to-delivery CAD/CAM solutions for the tooling and manufacturing industries, today announced that it had completed the acquisition of Korea Cimatron Technologies (KCT), its former Korean distributor.

In a move designed to strengthen and consolidate the company's position in the burgeoning Korean toolmaking market, Cimatron acquired 70% of KCT – adding to the 30% already held by the company.

The newly-acquired subsidiary will retain the KCT name, and continue to provide excellent service and quality solutions to customers, as previously. Mr SK Lee, former manager of KCT, has been appointed Cimatron Country Manger for Korea – and will continue to serve Cimatron clients and prospective clients.

"Cimatron sees Korea as a strategic, crucial market – both in and of itself, and as an excellent springboard into the rest of the Asia-Pacific region," noted Danny Haran, CEO of Cimatron. "We expect this acquisition to positively impact sales and brand recognition, already strong in Korea – and we intend to invest the efforts necessary to ensure our success in the country and region," he concluded.

In the coming months, Cimatron intends to expand sales and support staffing levels and activities in KCT, with a special emphasis on the mold design and 5-axis milling fields, in which the company's reputation and sales are already strong.

#### **About Cimatron**

Cimatron is a leading provider of integrated, CAD/CAM solutions for toolmaking and manufacturing. Cimatron is committed to providing mold, tool and die makers with comprehensive, cost-effective solutions that streamline manufacturing cycles, enable collaboration with outside vendors, and ultimately shorten product delivery time. More than 8500 customers worldwide employ Cimatron's cutting-edge CAD/CAM solutions for manufacturing in the automotive, consumer plastics, electronics, and other industries.

Founded in 1982, Cimatron is publicly traded on the NASDAQ exchange under the symbol CIMT. Cimatron's subsidiaries and extensive distributor network are located in over 35 countries to serve customers worldwide with complete pre- and post-sales support.
